

BEST PRACTICE REVIEW

REDUCE YOUR RISK AND GET MORE FROM YOUR IT INVESTMENT

Protect information assets

Is your IP and data secure?

Cybersecurity protection

How exposed are you to attacks?

Disaster recovery

How resilient are you to a disaster?

IT Governance

Do you have appropriate policies and processes?

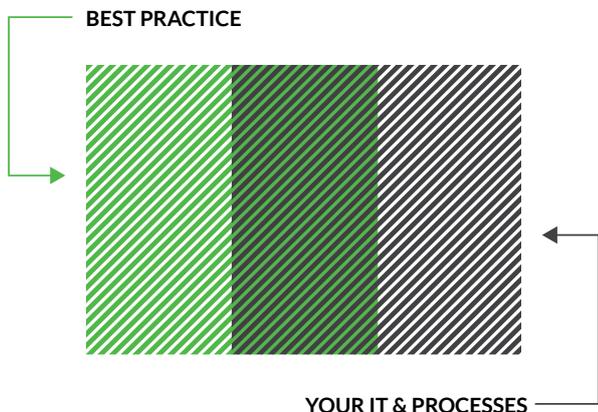

Staff capability

Are people making best use of your IT tools?

SCALABLE DEPENDING ON YOUR REQUIREMENT

GO BEYOND A BASIC IT AUDIT TO UNDERSTAND THE REAL ISSUES

Rather than simply reviewing what you've got, we uncover what you should be doing with IT to improve your business.

Scalable depending on your needs. Choose from just a simple review, to the starting point for a strategic IT plan in a comprehensive 20 page report. The review includes pricing indications, so you know the cost implications of identified issues.

Working through more than 150 different elements, our process ensures your output report focuses on the areas relevant to your business strategy.

We focus on 'why'... not 'what'.

GET ALL THE INFORMATION YOU NEED TO DECIDE YOUR IT PRIORITIES

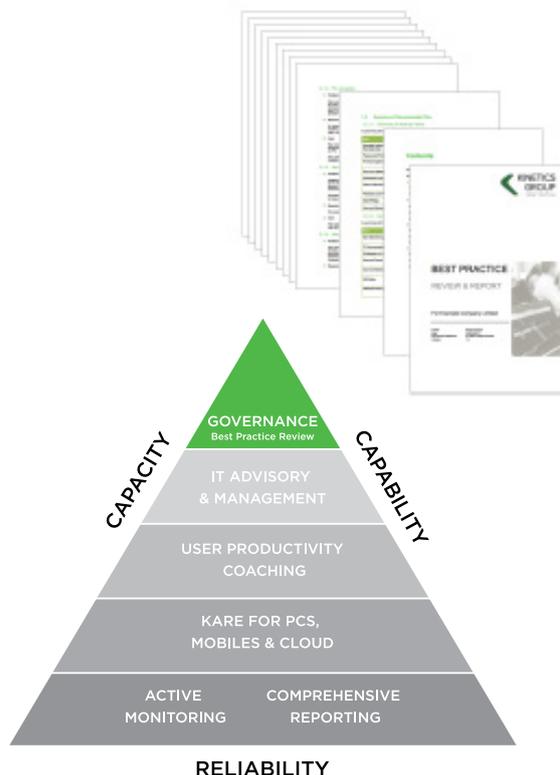

We bring a wide range of knowledge of the IT industry and new technologies to our reviews. From the size of our IT team, our diverse range of clients and the solutions they use we can provide advice and strategy that is difficult to get from an internal resource.

We are truly independent. We do not sell hardware or software and have an ingrained culture of finding the solution that provides the greatest benefit for the business needs of the customer.

We do not believe there is a "one size fits all" solution for our customers.

We have a long history of providing IT advice and then implementing the recommended technology across a broad base of customers. This gives us a unique insight into seeing the fruit of IT decisions through multiple life cycles. We do not just recommend solutions; we fully understand the technologies involved and are practiced at implementing them.

We are a large enough organisation to undertake all our clients requirements, yet small enough that you can be talking directly with the business owners.
